Notes to Item 19:

1. **Gross Sales.** Gross Sales are calculated as total sales minus tax and customer refunds.
2. **Average.** Average, also known as the “mean,” means the sum of all data points in a set, divided by the number of data points in that set.
3. **Median.** Median means the data point that is in the center of all data points used. That number is found by examining the total number of data points and finding the middle number in that set. In the event the number of data points is an odd number, the median will be the center number. If the dataset contains an even number of data points, the median is reached by taking the two numbers in the middle, adding them together, and dividing it by two.
4. Cary, NC was an Affiliate-Operated Location from 2019 to 2022. Brooklyn, NY-Bensonhurst was an Affiliate-Operated Location from 2018 to 2022.
