

**ITEM 19**  
**FINANCIAL PERFORMANCE REPRESENTATIONS**

The FTC's Franchise Rule permits a franchisor to provide information about the actual or potential financial performance of its franchised and/or franchisor-owned outlets, if there is a reasonable basis for the information, and if the information is included in the disclosure document. Financial performance information that differs from that included in Item 19 may be given only if: (1) a franchisor provides the actual records of an existing outlet you are considering buying; or (2) a franchisor supplements the information provided in this Item 19, for example, by providing information about possible performance at a particular location or under particular circumstances.

As of December 31, 2024, we had 1 Affiliate-Operated Location and 57 Franchise-Operated Locations. This Financial Performance Representation excludes data in connection with 38 Franchise-Operated Locations since those locations opened during the 2024 calendar year and were otherwise not open for an entire calendar year. There are no material financial or operational characteristics of the below Affiliate-Operated Location that are reasonably anticipated to differ materially from future franchised outlet operations.

Part I of this Item sets forth the total Gross Sales, Location Type, and Opening Date for the 1 Affiliate-Operated Location and the 19 Franchise-Operated Locations during the 2024 calendar year.

Part II of this Item sets for the average, median, high, and low Gross Sales generated by the 1 Affiliate-Operated Location and the 19 Franchise-Operated Locations during the 2024 calendar year.

**These outlets have earned this amount. Your individual results may differ. There is no assurance you will earn as much.**

**Notes to Item 19:**

1. **Gross Sales.** Gross Sales are calculated as total sales minus tax and customer refunds.
2. **Average.** Average, also known as the “mean,” means the sum of all data points in a set, divided by the number of data points in that set.
3. **Median.** Median means the data point that is in the center of all data points used. That number is found by examining the total number of data points and finding the middle number in that set. In the event the number of data points is an odd number, the median will be the center number. If the dataset contains an even number of data points, the median is reached by taking the two numbers in the middle, adding them together, and dividing it by two.
4. Cary, NC was an Affiliate-Operated Location from 2019 to 2022. Brooklyn, NY-Bensonhurst was an Affiliate-Operated Location from 2018 to 2022.
